RE: Petition to Convene a Contested Case Proceeding to Establish Permanent Prices for Interconnection and Unbundled Network Elements
Docket No. 97-01262

Pursuant to the TRA's Interim Order on Phase I (January 25, 1999) and Order for Reconsideration and Clarification of Interim Order on Phase I (November 3, 1999) BellSouth and AT&T filed on December 1, 1999, revised cost studies. On April 25, 2000, during the regularly scheduled Agenda Conference, the TRA adopted BellSouth's TELRIC Calculator Model for use in deriving permanent prices for unbundled network elements (UNE). At the same time, BellSouth was ordered to make adjustments to its Model. On June 9, 2000, BellSouth provided adjusted cost studies supporting proposed prices for unbundled network elements.

The Authority requests that BellSouth and AT&T provide the following data to the TRA and other parties of record by July 17, 2000, 12:00 noon:

1. A list of all inputs with each party's input values as presented in their cost studies for each input and compared to input values used in the FCC's Hybrid Cost Proxy Model.
2. Where the input value is not available for an element, explain the reason.
3. For the vertical features adjustments as ordered by the TRA, BellSouth shall identify each UNE whose cost is affected by the adjustments and how that specific element is affected.

Should you have any questions regarding this request, please contact Aster Rutibabalira 741-2904, ext. 155.

Sincerely,

David Waddell
Executive Secretary
